CLUTCHES • HEAD GASKETS • TIRE PRESSURE MONITORS

Steve Rapp, Service Manager - Your ASE Certified Master Technician

If you are looking for a shop that can professionally handle all of your maintenance and repair needs, stop in and visit our service department.

Maintenance & Oil Change Services - You do not have to go to the new car dealership for your scheduled maintenance services. We follow factory maintenance schedules, and are careful to use only the exact fluids and procedures specified by the manufacturer. Our maintenance services are high quality, and are comparable in price to other shops in the area.

Air Conditioning and Heater Repairs - We can service your air conditioning and heating system to keep you comfortable. We have the training equipment, and experience to service and repair even complex electronically controlled climate control systems.

Electrical System Repairs - Our technicians are well trained and very experienced at diagnosing and repairing complex vehicle electrical systems. We can repair modern microprocessor controlled body control systems, factory security systems, airbag lights, keyless entry, charging and starting problems, and vehicle computer network issues.

Wheel Balancing and Alignment - We have a state-of-the-art Hunter Engineering GSP9700 Road Force balancer and a Hunter 4-Wheel Computer Alignment System. With this equipment we can correct uneven tire wear, vibrations, handling problems, and other steering and suspension concerns. We can recalibrate your car's steering angle sensor after alignment so you will not have a stability system warning light on requiring a trip to the dealer; few other alignment shops have this ability.

Tires - We have most brands of tires available in all price ranges, including names such as Michelin, Delta, Cooper, Kumho, Firestone, Goodyear, BF Goodrich, and many more; all at very competitive out-the-door prices.

Brakes - Proper brake operation is critical for your family's safety. We install only the highest quality brake components and pay attention to even small details so that your brakes will work quietly and safely. Our brake services are comparable in price to other shops that routinely use generic parts that may not meet the same quality specifications as what your vehicle was built with. We are also very experienced at diagnosis and repair of anti-lock brakes, traction control, stability control, and hydraulic system problems.

PA State Inspection - Let our experienced, PA State Licensed Technicians take care of your Pennsylvania Safety Inspection needs.

Engine and Transmission Performance - Do you have a warning light on, or is your vehicle not running well? We have an ASE Master Technician with L1 Advanced Engine Performance Certification waiting to diagnose and repair the problem.

Major and Minor Engine Repair - Our technicians have many years of experience performing heavy engine and driveline repairs. We service head gaskets, timing belts, cooling systems, differentials, transmissions, and can handle repairs that most other shops turn away.

Our Commitment - Our technicians are committed professionals dedicated to keeping current with the latest technology so that we can continue to serve your needs. They are ASE Master Certified and continually attend advanced training to keep their skills current. We operate in an advisory capacity for Automotive Technician training programs at two technical schools.

At our Shop you deal directly with the technicians working on your car, not a service writer. We take the time to explain what is needed in as much detail as you wish, and will provide written estimates for any service needed. We want your repair experience to be a pleasant one, so you will join our large family of satisfied regular customers.
