

50 Ton Boom Truck

Zartman Equipment Rental recently purchased a National Crane NTC55 truck crane. This 50-ton truck-mounted crane can maneuver in tight spaces with a compact outrigger configuration.

“We are upgrading our fleet to ensure the reliability of service that our customers have come to associate with Zartman,” said Tim Clark, Vice President of Operations. “This new boom truck expands the versatility of our cranes, allowing us to provide better services for our clients.”

Featuring a 128-foot five-section main boom and 26-foot with 30-degree offsetable jib, this crane is ideal for tree work. A larger capacity with a small footprint will allow for easy access on small job sites.

There are four outrigger positions, including a unique 20-foot span for tight spaces. The operator cab can tilt up to 20 degrees, allowing for better visibility.

Sometimes outpromised. **Never outperformed.**

Hoist FR 40/60

Zartman Construction has expanded their rental fleet with the addition of a new forklift. A Hoist FR 40/60 is now available as a rental with an operator.

The machine is capable of moving up to 58,600 pounds with the boom attachment or up to 61,400 pounds with the forklift attachment. It is a great tool for moving heavy machinery and equipment.

“We are excited to be able to offer a new service to our rental customers,” said Tim Clark, Vice President of Operations. “This versatile machine will be very helpful to many of our clients.”

It can be operated via the cab or a remote control. The ability to remotely operate this machine allows for greater maneuverability and safer handling of loads.

It also features an extendable counterweight frame allowing for greater stability and extended load centers. This machine also boasts the ability to easily maneuver in tight areas.

Along with equipment rental, Zartman Construction also offers millwright and other industrial services.
